DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Russell et al.

Russell et al. shows a prior art atomizer device for the production of a liquid-gas mixture, the mixture for the purpose of compression into a nozzle arrangement in which the kinetic energy of the mixture is in large part converted into compression energy of the gaseous component, the atomizer device comprising a nozzle member having an at least substantially central pipe 12 for the gaseous medium, a rotationally symmetrical nozzle chamber 20 surrounding the pipe for the liquid medium, and a nozzle aperture; and a liquid feed means for producing a swirled liquid flow in the nozzle chamber wherein the nozzle aperture coaxially encloses the pipe. The device of Russell et al. is capable of carrying the method of claims 4-6.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Simmons et al., Halvorsen et al., and Helmrich are pertinent to Applicant's invention.
